IAN KIROMO

B.Sc. in Applied Computer Science | Full-Stack & Cloud Engineer

Nairobi, Kenya | +254 796059830 / +254 780433596 | ikiromo9@gmail.com | linkedin.com/in/ian-kiromo-2a1239371/

PROFESSIONAL SUMMARY

Applied Computer Science professional with practical experience in full-stack development (React, Flutter, PHP) and enterprise networking. Recently completed an intensive attachment at Health Strat, deploying cloud applications on Azure and managing network infrastructure. Passionate about cybersecurity, with hands-on training in penetration testing and SQL injection analysis. Seeking to leverage technical skills in building secure systems and protecting infrastructure.

EDUCATION

Daystar University - School of Science, Engineering & Health

Bachelor of Science in Applied Computer Science (May 2023 - September 2026)

TECHNICAL SKILLS

Programming & Tools: Visual Basic, Flutter, React, Laravel, Kali Linux, VMware, Burp Suite, SQL injection, Articulate, WordPress

Operating Systems: Windows, Linux (Kali) | Backend: XAMPP (PHP backend), MySQL Flexible Server, Nginx

Generative AI & Cloud: Google Gemini API Integration, Prompt Engineering, Microsoft Azure (Linux Web Apps, Entra ID)

Physical Security & Hardware: Hikvision Ecosystem, IP Camera Configuration, NVR/DVR Management, Fault Diagnosis

WORK EXPERIENCE (Attachment)

ICT Trainee / Attache - Health Strat | Nairobi, Kenya (Sept 2025 - Dec 2025)

- Cloud & Infrastructure: Migrated PhoneMart application from local hosting to Microsoft Azure (Linux Web Apps) and configured MySQL Flexible Servers and Nginx routing for production.
- Network Security: Secured enterprise networks by configuring MikroTik routers (NAT, DHCP, Firewall rules) and port forwarding.
- System Administration: Managed Active Directory (AD) user identities synchronized with Azure Entra ID and enforced MFA.
- Full-Stack Development: Engineered POS backend using PHP, implementing Role-Based Access Control (RBAC).
- Technical Support: Provided Level 1/2 support for hardware/software issues and developed interactive eLearning modules for NASCOP

PROJECTS

Phone Repair System (Visual Basic)

- Designed and developed a desktop application using Visual Basic to streamline phone repair workflows from intake to completion.
- Created user-friendly forms for data entry and implemented logic to automate customer status updates and reporting.

Cleanash Robotics Project

- Collaborated in a DITA club project to build a functional cleaning robot, troubleshooting hardware under constrained resources.

FEATURED PROJECTS (Continued)

Phone Mart POS Project (React, Flutter, PHP, Azure, Gemini AI)

- Developed a Point of Sale (POS) system called Phone Mart, utilizing React for web interface and Flutter for mobile app development.
- Built backend functionality using PHP with XAMPP; migrated system to Microsoft Azure cloud hosting with Nginx routing.
- Integrated Google Gemini AI (LLM) to automatically generate news and content using the Gemini Generative AI API.
- API Security: Implemented secure server-side key management (Environment Variables) to protect API credentials in production.
- Data Visualization: Designed an interactive analytics dashboard to visualize sales trends and payment data.

Project PhishSim (AI-Driven Cybersecurity Simulation)

- AI-Driven Phishing Campaigns: Integrated Cerebras API into a Laravel backend to generate highly realistic localized phishing emails.
- Organization-Specific SMTP: Configured dynamic SMTP protocols allowing SMEs to link corporate domains to dispatch simulations.
- Vulnerability Tracking: Built React dashboard capturing real-time metrics, tracking and logging when users click malicious links.
- Automated Training: Automated training pipeline directing employees who fail simulations to an interactive eLearning module.

CERTIFICATIONS & PROFESSIONAL TRAINING

- IBM 10 Weeks Cybersecurity Professional Certificate: Completed (credly.com/users/ian-kiromo)
- Claude Partner Network: Completed Anthropic learning path, including Agent Skills and MCP courses (May 2026).
- AI & Agentic Workflows: Completed Agentic AI Hands-on via Cognitive Class / IBM Skills Network (May 2026).
- TryHackMe Certification: Developing expertise in penetration testing and cybersecurity tooling.

LEADERSHIP & INVOLVEMENT

Member - Daystar Information Technology Association (DITA)

- Engaged in collaborative IT projects, knowledge-sharing sessions, and technical workshops with peers in Applied CS and MIS.

ACADEMIC & PROFESSIONAL REFEREES

Dr. Jane Kimathi
Lecturer & Dean, School of Science, Engineering & Health | Daystar University | jkimathi@daystar.ac.ke | +254 720 423722

Eng. Derick Luvembe
Senior Infrastructure Lead - Health Strat | derekluve@gmail.com | +254 724 753 880

Mr. Edwin Ragira
Lecturer, HOD Computer Science Department | Daystar University | eosoro@daystar.ac.ke | +254 712 329618

Mr. Martine Opio Shikuku
IT Specialist | martineopiyo7@gmail.com | +254 748 871307
